ABOUT BINAURAL VIBROACOUSTIC THERAPY

The Binaural Acoustic and Dynamic Stimulation is a computer-controlled acoustic and vibrational therapy that trains the brain to relax and benefit from deep relaxation techniques. Using specific vibrations and binaural audio frequencies, based on extensive scientific research, making it possible for even the busiest minds to achieve deep levels of relaxation in one therapy session.

Similar to meditation, specific sounds slow down mental activity and vibrational frequencies act specifically on the energy centers (chakras) of the body.

The foundational therapy is Quantum Harmonic audio therapy. It delivers symptom-reducing and resilience-building multi-layered programs through stereo headphones. Your chosen therapy can also be combined with any treatment from the spa menu to provide a personalised experience.
