Our Initiatives
SUSTAINABILITY IMPACT

ENVIRONMENTAL EFFICIENCY

COURTESY BIKE

Guests can use our electric courtesy bikes and car, with energy that comes from certified renewable sources, reducing CO2 emissions.

WATER CONSUMPTION REDUCTION

We are reducing water consumption in guest rooms and in the back of house areas by installing aerators on all taps.

PUBLIC TRANSPORTS SUBSCRIPTION

We provide ATM public transport passes to all colleagues with permanent contracts to encourage the use of sustainable mobility.

PLASTIC CONSUMPTION REDUCTION

We distribute reusable water bottles to all colleagues and have installed refill stations throughout the offices.

ENERGY EFFICIENCY

AIR CONDITIONING

The hotel's air conditioning system operates using heat pumps that utilise groundwater, which is drawn from a well and subsequently returned to the groundwater source.

SUSTAINABLE ENERGY PURCHASE

Our electrical energy is purchased from certified renewable sources, reducing CO2 emissions (wind, solar and ocean).

HOTEL RELAMPING

We have undertaken a relamping project throughout the hotel, replacing old lighting systems with energy-efficient LED technology. This initiative reduces energy consumption and aligns with our commitment to sustainability and environmental responsibility.

IN-ROOM PRACTICES

We follow the Green Linen Programme, changing sheets and towels every other day unless otherwise requested, to reduce water consumption.

We have eliminated single-use plastic in our rooms, implementing instead plastic-free amenities.

RESPONSIBLE PROCUREMENT

Many of our products, including coffee, cacao, tea, vanilla and seafood are sustainably sourced, organic, eco-certified and responsibly obtained. We ensure they do not involve endangered species and are produced without forced or child labour.

For our office and Guest supplies, we are committed to using only FSC-certified paper to support responsible forest management and sustainable use of resources.

Our commitment to supplier traceability, combined with our zero-waste approach in the kitchen—where leftovers are transformed into broths, reductions and sauces—ensures that every ingredient is used to its fullest potential.
