

Technical Specifications

Hydraulic Broomer (Sweeper)

Sweeping width		2100 mm
Overall length	:	2550 mm
Overall width	:	1150 mm
Overall height	:	1020 mm
Weight of machine	:	380 kg
Brush diameter	:	510 mm
Brush material	:	Nylon
Drive	:	From Tractor Hydraulic
Waste collector Capacity	:	175 ltrs
Sweeping speed	:	7 to 15 km/hr

Salient Features :

- A Simple attachment behind the tractor.
- Frame and linkage are entirely made of steel.
- A very effective & efficient m/c to sweep the roads prior to tack coating.
- Tractor hydraulics are used for lifting & lowering the m/c on surface to be swept.
- Tractor's hydraulic pump is used to drive the brush sections.
- A collection box is provided to collect the swept debris.
- Steel wire brush provided on customer demand.
- Easy emptying of bucket by tractor hydraulic.
